# Delizio Tallow and Deep- frying Fat

10 kg (4 x 2,5kg) & 12,5 kg

A natural and tasty deep-frying fat based on a unique mixture of delicately refined beef fat/tallow. Made up of selected raw materials and specially processed into a perfectly stable and durable deep-frying fat with a prolonged shelf life. Delizio Deep-frying fat lasts up to 40% longer than similar products. Intended for the professional user.

**Ingredients:** Mixture of natural doubly refined beef fat/tallow, that may or may not have been fractionated, aromas, anti-foaming agent (polydimethylsiloxane) E900.

- Pleasant aroma when heating up
- Extremely suitable for typical Belgian fries, with a delicious flavour
- Heat resistant
- Crisp end result with a pleasant aroma
- Extremely stable deep-frying fat with extended shelf life
- Reaches cooking temperature quickly
- Does not contain hydrogenated fats
- Easy to digest
- Allergen-free (soya, peanuts) and no GMO components (soya, corn)

# Delizio Palm Fat

10 kg (4 x 2,5kg)

A responsible deep-frying vegetable fat composed of 100% refined palm oil that may or may not have been fractionated. Delizio Palm deep-frying fat has an exceptionally stable fatty acid balance and is low in trans-fats. Perfectly suitable for temperature-sensitive and demanding hot preparations. Intended for the professional user.

**Ingredients:** Vegetable oils and fats, that may or may not have been fractionated and/or partially hardened, aromas, anti-foaming agent (polydimethylsiloxane) E900.

- Neutral aroma when heating up
- Exceptionally high performance, which results in a longer shelf life
- Temperature resistant
- Low in free fatty acids
- Product will not burn
- Deep-fried food does not shine and has a dry and tasty appearance
- Pleasant feeling in the mouth; no unpleasant fatty film in the mouth, not even with food coated in breadcrumbs.
- Low trans-fat level < 7%
- Superior vegetable-based product
- Allergen-free (soya, peanuts) and no GMO components (soya, corn)
